ESIEE ENGINEERING

MACHINE LEARNING (IMC-4302C)

LAB 2: LINEAR REGRESSION (CONTINUATION)

School Year

2017-2018

7/2/2018

Lab 2 (only 2 question)

- In this second practice session, we will train our linear model and predict outputs by using predefined functions in **sklearn Library**.

- This library has many classes and modules that are useful for different problems of machine learning. During this session, we will use **Linear Regression class** from **Linear Model module**.

- **→ Send your code and report by mail before next session to get the correction. Any submission after the correction won't be considered.**
