LAB 8: K-NEAREST NEIGHBORS CLASSIFIER

SLIM BEN AMOR: SLIM.BEN-AMOR@INRIA.FR

School Year
2017-2018

16/3/2018

About Lab 8

- **Outline:**

- Understand problem of skewed class and introduce other performance measurement (precision, recall, F1-score)
- Implement K-nearest neighbors classifier and evaluate its performance.

→ **Send your report and 2 labs (Lab 7 and 8) code by mail before next session (by Monday 03/19).**

→ You may submit one report per group of 2-3 persons.

Performance measurements

- Precision:

$$precision = \frac{TP}{TP+FP}$$

- Recall:

$$recall = \frac{TP}{TP+FN}$$

F1-score:

$$F_1\text{score} = 2 \times \frac{precision \times recall}{precision + recall}$$
